Westfalia Mobil – for more than 60 years our company has stood for the enchantment of mobile leisure time. For more than 60 years we have developed motor homes which are both your mobile companion and a second home for you, our customers. Our vehicles will win you over with their well thought-out floor plans as well as their perfect craftsmanship and their excellent handling characteristics, so most of the time you will feel you are driving a car. That’s why for more than half a century leading car manufacturers like Mercedes Benz, Fiat and Opel have built on our engineers’ and technicians’ experience. And for the same reason you, our customers, keep on voting vehicles made by Westfalia “motor home of the year” in promobil’s reader surveys. We particularly appreciate this award because you, our customers, gave it to us. Namely, the people who travel in our motor homes every day and who are better placed than anyone to evaluate the quality of our products. With the Sven Hedin we have developed a vehicle which stands for another essential principle of our company’s philosophy: continuous dialogue with our customers. You made very clear demands on the Sven Hedin. A vehicle with at least four sleeping places, a functionally designed floor plan, good loading possibilities, separate functional areas for kitchen and bathroom – all integrated into a motor home that is not too big and therefore easy to drive. We want to show you here how we managed to fulfil your wishes.
Light and friendly – the lighting concept in the Sven Hedin.

Ergonomics – the moulded cockpit seats in the Sven Hedin.

Underlines the futuristic line of the vehicle – Sven Hedin’s high roof.
Mobile comfort

We use the Mercedes Sprinter as the basis for the Sven Hedin, a vehicle base whose pedigree leaves no room for doubts. A van which is the undisputed standard in its class due to its chassis technology as well as its active and passive safety concept. We combine this basis with a high roof, especially developed for Westfalia. The result is a vehicle which creates a distinctive and permanent impression just with its strikingly elegant silhouette. The high roof as well as the walls of the Sven Hedin feature special insulation material, providing not only better climatic characteristics but also improved sound insulation. The perfect craftsmanship found in the Sven Hedin’s furniture as well as the electric, water and gas systems make a convincing impression. The solid construction and bolted joints guarantee long-lasting stability, even after many exciting and fun-filled journeys. One of the two double beds in the Sven Hedin is situated on a rail system in the high roof. Like the double bed in the converted seating arrangement in the living area this offers exceptional sleeping comfort. This is the result of the optimal interaction between the frame, springs and mattress. Talking about comfort: the seat bench in the Sven Hedin has been ergonomically optimised and will remind you of the seating comfort in a saloon car, so you reach your destination perfectly relaxed.
We are particularly proud of the kitchen and bathroom area in the Sven Hedin. Both solutions show how functional and at the same time generous the use of a limited space can be.

The high roof offers space for a generous double bed.
Attractive functionality

The Westfalia Sven Hedin will win you over the first time you enter it. You will experience the lasting effect of the Sven Hedin’s enchanting conception and design on your first journey. For that reason we would like to draw your attention to some of the convincing details right now. The Sven Hedin makes a convincing impression not only with its comfort but also its exceptional functionality. This can be seen for example in the easy conversion of the seating arrangement in the living area into a double bed or the numerous easily accessible storage compartments.

Your clothes as well as your dishes and cutlery can be neatly stored in the wall and ceiling compartments in the living and kitchen areas, while bulky goods can be comfortably stored in pull-out drawers underneath the kitchen and bathroom area. The fact that we installed a shoe cupboard in the entrance to the vehicle once again shows how much we care about details. Now you don’t have to bring your shoes and sand from the beach into your motor home, so no need to sweep out the sand later. Our engineers and technician are devoted to their craft and are as enchanted by motor homes as you are. Both of us benefit from our common passion.

Form and Function.

The Westfalia Sven Hedin will win you over the first time you enter it. You will experience the lasting effect of the Sven Hedin’s enchanting conception and design on your first journey. For that reason we would like to draw your attention to some of the convincing details right now. The Sven Hedin makes a convincing impression not only with its comfort but also its exceptional functionality. This can be seen for example in the easy conversion of the seating arrangement in the living area into a double bed or the numerous easily accessible storage compartments.
Whether this concerns the outside shower or the XXL drawers – the rear of the Sven Hedin features sophisticated details.

Everything at hand – the control panel for the on-board electrical system in the Sven Hedin.
Just well though-out – Sven Hedin’s storage space concept.

Perfect function and attractive design – the Sven Hedin is love at first sight and will keep enchanting you.
